WORK EXPERIENCE

Software Engineer Intern-SDLC Corp

Aug 2025 - Present

- Developed responsive and interactive web applications using React.js, JavaScript, HTML5, and CSS3 to enhance user engagement.
- Integrated REST APIs to boost application functionality and streamline user experiences.
- Collaborated with cross-functional teams to implement new frontend features, optimizing project workflows and improving efficiency.
- Executed responsive design principles, state management, and authentication flows to ensure seamless user interactions across platforms.
- Managed deployment workflows, ensuring timely project releases and maintaining high-quality standards throughout the development process.

INTERNSHIPS

Customer Churn Prediction-Stanza Living

4 Months

- Analyzed supply-demand data using advanced Excel functions and SQL queries to optimize KPI tracking and improve reporting accuracy.
- Collaborated with cross-functional teams to refine operational planning processes and streamline business workflows for increased efficiency.
- Developed comprehensive reports to identify trends, uncover insights, and support strategic decision-making.
- Enhanced data visualizations to effectively communicate key metrics, boosting stakeholder engagement and understanding.

Frontend Projects-SDLC corp

6 Months

- Developed responsive and interactive web applications using React.js, JavaScript, HTML5, and CSS3 to enhance user engagement.
- Integrated REST APIs to boost application functionality and streamline user experiences.
- Collaborated with cross-functional teams to implement new frontend features, optimizing project workflows and improving efficiency.
- Executed responsive design principles, state management, and authentication flows to ensure seamless user interactions across platforms.
- Managed deployment workflows, ensuring timely project releases and maintaining high-quality standards throughout the development process.

PROJECTS

NectorNest

31 Days

- Developed a fully responsive e-commerce platform for a premium honey brand using React.js, JavaScript, HTML5, CSS3,

- and Tailwind CSS.
- Designed and implemented reusable UI components to enhance user interaction and streamline product listing pages.
 - Optimized responsive navigation and mobile-friendly layouts to improve cross-device user experience.
 - Applied modern UI/UX design principles while boosting application performance and ensuring SEO best practices.
 - Managed end-to-end project lifecycle, including development, testing, version control with Git/GitHub, and deployment on Vercel.

Personal Portfolio Website

2 Months

- Designed and developed a professional portfolio website to effectively showcase diverse projects and technical expertise.
- Highlighted key certifications, research publications, and internship experiences to boost credibility and professional visibility.
- Implemented responsive design techniques to ensure seamless accessibility across multiple devices and screen sizes.
- Applied modern UI/UX best practices to enhance user engagement, navigation, and overall experience.
- Deployed the website on Vercel, optimizing performance, scalability, and reliability.
- Integrated direct links to GitHub, LinkedIn, and live project demos to enhance networking and professional outreach.

LeadFlow Pro — CRM & Lead Management Platform

30 Days

- Developed a CRM and lead management platform utilizing React.js and Tailwind CSS for enhanced user experience.
- Designed and implemented responsive dashboard interfaces and secure authentication workflows.
- Created lead tracking modules and reusable frontend components to streamline development.
- Integrated RESTful APIs to ensure seamless data communication between frontend and backend.
- Optimized application performance and responsiveness to improve user engagement.
- Managed end-to-end development lifecycle independently, ensuring timely delivery and quality.

AI Spent Audit

1 Weeks

- AI Spend Audit is a Full Stack SaaS application that helps organizations analyze and optimize AI tool expenses. Developed using - Utilized Next.js 16 and TypeScript to develop scalable and high-performance web applications.
- Integrated PostgreSQL with Prisma ORM for efficient and reliable database management.
 - Implemented secure authentication flows using NextAuth.
 - Developed payment processing solutions with Stripe API integration.
 - Leveraged OpenAI API to enhance application intelligence and functionality. Features include AI-powered spending audits, subscription billing, team collaboration, analytics dashboards, PDF reports, and role-based access control.

Mall of America

3 Weeks

- Developed a cinematic, premium browser-based interactive sales presentation for Mall of America, targeting retail brands, sponsors, and corporate partners.
- Built a responsive single-page application (SPA) using Next.js 16 App Router and TypeScript, leveraging reusable, modular component architecture.
- Implemented advanced animations and smooth scrolling effects with Framer Motion, GSAP, and Lenis to enhance user engagement.
- Designed visually rich, mobile-first responsive sections including Hero, Retail & Luxury, Dining & Entertainment, Events & Sponsorship, and Contact.
- Structured content using fully typed data files, ensuring streamlined content management and CMS-ready scalability.
- Optimized frontend performance through best practices and deployed the application efficiently on Vercel for seamless production delivery.
- Created an immersive user interface delivering a high-impact digital experience aligned with brand objectives.

EDUCATION

- MBA/PGDM | Business Strategy
- 2025
- Galgotias University, Greater Noida
- Grade - 7.4/10
